Education

Bachelor of Applied Science
Degree in Information
Technology, State Polytechnic
of Jakarta, ID, 2021

Diploma in Software
Engineering, CEP-CCIT Faculty
of Engineering, University of
Indonesia, ID, 2019

Languages

English - Very Good

Indonesian - Fluent

German - Basic

Industry Experience

Banking - Foundational

Healthcare - Entry

Profile

Qualified and committed software programmer in web development. Offering years of working experience and specialized knowledge in Lumen/Laravel Framework. Demonstrated history of building a positive rapport with peers and achieving identifiable results.

I'm also a writer, game and graphic designer for tabletop roleplaying game (TTRPG), publishing my own content for Kerisian Kult.

Key skills

I'm experienced in PHP development, Lumen and Laravel Framework. I also have experienced building architecture for web application using Domain Driven Design Pattern and Porto System Architectural Pattern. My experience includes familiarity in financial business sectors for backend API integration such as PPOB (Payment point online banks) and Mass Payment Transfer.

Aside from the tech industry, i'm experienced with graphic design and layouting using canva or affinity designer.

Work Experience

Dec 2025 - Current
